## Eberspächer fyr - sikring under transport

Eberspächer fyret har en timer, der kan benyttes, hvis fyret skal starte automaisk. For at undgå at fyret, ved en fejl, går igang under transport, hvis timer-funktionen er aktiveret, fjernes sikringen.

Efter endt transport monteres sikringen igen.

## Eberspächer heater - safety during transport

Eberspächer heater has a timer, which can be used to start the heater automatically. To avoid the heater to start, by mistake, during transport, if the timer is set, the fuse connecting the heater is removed.

After transportation the fuse is mounted again.
